

About Concord International Hospital

At Concord International Hospital, we offer a totally different healthcare experience; one with personalised attention, efficient service and unsurpassed medical care.

Unlike hospitals that specialise in high-volume treatments and procedures, Concord International Hospital offers high quality medical and nursing care in a boutique setting which is elegant and intimate, providing discreet luxury which conveys safety and trust.

Equipped with state-of-the-art and proven advanced medical technologies and coupled with our strong affiliation with The University of Texas MD Anderson Cancer Center in the United States, Concord International Hospital redefines the concept of compassionate and professional care by offering a truly unique healthcare experience that enhances the healing process.

Our medical services include comprehensive cancer-related treatments, comprehensive women's health services, minor and major surgeries and robotic and minimally-invasive-surgeries. We also offer a wide range of health screening and wellness packages.

For enquiries on our hospital services, please contact our International Patient Liaison Centre at +65-69333722 or iplc@concordmedical.com

Before Your Health Screening

Familiarise yourself with these guidelines before your health screening:

- Bring any past medical reports, scans results and medications.
- Fasting is required for tests like the abdomen ultrasound and blood tests. Abstain from food and drinks for at least 10 hours before your appointment. Sips of plain water are allowed.
- Return for a full, targeted review of your health screening results that includes lifestyle recommendations and health advice.
- Bring your identification documents for registration (ie. NRIC, passport, company's letter or staff pass).
- Do not consume medicine or administer insulin (for diabetes) on the morning of your appointment.
- Regular medications for your heart and high blood pressure are allowed.
- Bring your spectacles for vision tests. Do not put on contact lenses when you come for your appointment.
- You can collect a specimen kit for your urine and stool tests at any screening centre before your appointment. You can also collect the sample kit during your screening appointment.
- For ladies, the urine, stool and Pap smear tests should be done at least 5 days before or 5 days after your period.
- The screening will span over one morning.
- Be punctual for your appointment.
